

School Security

Please know that we have security measures in place in all of our schools to better ensure the safety of students and staff. These security measures have been developed in coordination with the Hazlet Township Police Department and comply with New Jersey State Regulations. In addition, The Hazlet Township School District regularly reviews our security measures with each principal to ensure that staff monitoring access to each building is vigilant. Currently, we are also in discussions with the Board of Education on how to improve these practices even further. The importance of ensuring that our security procedures are monitored frequently with staff, the local police department and with our administrative team is something that our district takes extremely seriously. We cannot do this alone and need your support, cooperation and patience when visiting our schools. This will assist us with being successful when implementing our security practices.

Sincerely,

Bernard F. Bragen, Jr.
Superintendent of Schools
